Please replace the Abstract with the following rewritten Abstract:

~~The present invention relates to an~~ An ink jet recording element having very good dye keeping properties in time. ~~Said~~ The recording element comprises a support and at least one ink-receiving layer, ~~said the~~ the ink-receiving layer comprising at least one hydrosoluble binder and at least one aluminosilicate polymer ~~obtainable~~ obtained by a preparation method consisting in treating an aluminum halide with a mixture of at least one silicon alkoxide only having hydrolyzable substituents and at least one silicon alkoxide having a non-hydrolyzable substituent, with an aqueous alkali in the presence of silanol groups, the aluminum concentration being maintained less than 0.3 mol/l, the Al/Si molar ratio being maintained between 1 and 3.6 and the alkali/Al molar ratio being maintained between 2.3 and 3; and then stirring the resulting mixture at ~~ambient~~ a temperature of from 15°C to 35°C in the presence of silanol groups for long enough to form the hybrid aluminosilicate polymer.
